TIDBITS' EATS
DANGEROUS DINNERS
by Janet Spencer

Come along with Tidbits as we nibble some of the world's most questionable foods!
CASSAVA

- Cassava, also called manioc, is a tropical plant whose starchy tuberous root is similar to the yam. It's the source of tapioca. It's the third most important source of calories for people in the tropics, after rice and corn.
- Cassava is edible, but there's a catch: the root tubers contain a substance called linamarin that triggers the production of cyanide within the body after being ingested due to its interaction with bacteria in the gut. There are two types of cassava: sweet cassava, and bitter cassava. Sweet cassava contains only a small amount of linamarin whereas bitter cassava contains almost ten times more.
- Sweet cassava is safe to eat after being boiled, which destroys the linamarin. But bitter cassava must go through a long process of peeling, grating, drying, soaking in water, fermenting, boiling, rinsing, and cooling before it is safe.
- Depending upon the amount eaten, ingesting linamarin causes rapid respiration, a drop in blood pressure, rapid pulse, dizziness, headache, stomach pain, vomiting, diarrhea, mental confusion, twitching, convulsions, and sometimes death.

9. Verification of Distribution – Carrier Delivery and Mail Distribution

Tidbits of Linn County / Johnson Counties did not report significant carrier delivery or mail distribution during the audit period. Carrier delivery is verified through the review of carrier statements and/or additional publisher support documents. Mail distribution is verified through the review of postal mail statements and/or additional publisher support documents.

10. Verification of Distribution – Controlled Bulk / Demand Distribution / Single Copy

The Circulation Verification Council performed delivery verification in the primary market areas indicated in paragraph nine. Delivery verification is performed using multi-source methodologies considered necessary under the circumstances of the audit. Delivery verification can include, but is not limited to, on-site verification, business phone verification, online, email, and/or social media contact. Delivery verification source data can include, but is not limited to, business and cell phone listings, delivery lists, opt-in email, online, and/or social media databases. Circulation Verification Council performed the delivery verification from locations chosen randomly from the publication’s delivery list(s).

CVC verification substantiates Tidbits of Linn County / Johnson Counties’s claim of 195 returnable source distributed editions returned to the publisher unclaimed after the edition cycle.

11. Paid Reporting Analysis – Not Applicable

12. Optional Digital Reporting - Not Reported

13. Council Audit Statement

Circulation Verification Council (CVC) reviewed the printing, distribution, circulation, technology, and general business records of this publication for the purpose of compiling this information. The review was completed using Council audit procedures considered necessary under the circumstances of the audit in compliance with CVC Rules and Regulations. In our opinion, this report fairly and accurately represents the publication's printing, distribution, circulation, and technology reporting, if applicable, for the period indicated. The publication has sworn that the information presented for this audit reporting is accurate and supplied CVC with general business records substantiating the information under audit review. This report is released subject to the provisions of the CVC Rules & Regulations which are hereby incorporated by reference. CVC Rules & Regulations may be amended from time to time without notice at the sole discretion of CVC. In no event shall CVC be liable for indirect, incidental, consequential, special, or punitive damages, or damages for lost profits, lost income, or lost savings arising by negligence, intended conduct, breach of contract, or otherwise. CVC reports and data are released for the sole use of advertising purchase evaluations and any use for valuations or determination of value is strictly prohibited. CVC reports may not be used for USPS requestor or other permit qualifications. This report is subject to copyright laws and may only be reproduced by the publisher.

Tidbits of Linn County / Johnson County - Cedar Rapids, IA - 01-2559 - Supplemental Readership Study

The Circulation Verification Council surveyed Tidbits of Linn County / Johnson Counties readers in the primary market areas indicated in publication’s CVC audit report. The purpose was to identify the number of individuals who indicate they have read at least two of the last four issues of the publication, and gather study information solely for advertising purchase evaluations. Market statistics estimates appearing in CVC reports, when available, are obtained from EASI Software. CVC study sources can include, but are not limited to, residential and cell phone surveys, online surveys, email surveys, and/or social media surveys. Study source data can include, but are not limited to, residential phone listings, cell phone exchanges, publisher delivery lists, opt-in email, online, and/or social media databases. Residential and cell phone survey populations consist of adults age 18 and over, living in households within the survey area. Within this area, each individual had a known (or “non-zero”) probability of being selected for the random sample. Surveys were conducted solely with pre-designated respondents and no substitutions were permitted. Initial survey attempts were spread evenly across all survey days (i.e., Tuesday through Saturday). A minimum of 250 completed surveys, or 2.5% of net circulation for publications under 10,000 circulation is required with no more than one survey per household. Survey Procedures: To ensure the highest degree of comparability and to facilitate the survey process, a standard, consistent, specified list of questions was asked. Surveys were conducted over a minimum period of two weeks to minimize the impact of weather and/or special circumstances. Every effort was made to ensure that surveys were assigned randomly by day and that an approximately equal number of surveys were completed on each survey day. Where appropriate, data was balanced and/or weighted by ZIP code using up-to-date known demographics: gender, age, number of adults in household and ethnicity in those cases where one minority comprised no less than ten percent of the total population. Non-responses to any single question were eliminated from the survey. In all cases, at least four attempts were made to contact all pre-designated respondents. Every effort was made to surmount language, cultural, behavioral and other barriers to a successful survey; and to the extent feasible, contact attempts were scheduled on a random basis. During the survey process, no questions were asked prior to the readership question, with the exception of a qualifying question designed to determine the ZIP code of the individual; and a general warm-up call explanation designed to put the respondent at ease. Warm-up questions did not include any reference to a publication itself or the nature of the study information. The study followed recommended guidelines developed in part from established media usage and evaluation guidelines. Survey totals may not equal 100% due to rounding. The Circulation Verification Council estimates that all the information in this survey has a maximum error margin of +/-4% at the 95% confidence level. 0 Survey respondents were interviewed during the verification of carrier delivery and mail distribution. 243 Survey respondents reported reading a minimum of two of the last four issues through single copy, controlled bulk, or pass along distribution. 66 Survey respondents responded to a geo-coded outbound email verification. This publication did not participate in the CVC online research program.

• **Average estimated readers per edition during the audit period: 4.6**
